

Summary

PDAC	Duct cut off Bulge 10% isoenhancing
MD IPMN	PD > 5 mm Fish mouth
Mixed IPMN	PD > 5 mm With dilated SB Fish mouth
SB IPMN	Cystic lesion Connects with PD
MCN	“Mother lesion” Macrocytic Eggshell Ca²⁺

Summary

pNET	Arterial enhancement Can be very big Endovascular growth
SPN	“Daughter lesion” Smooth contour Macrocystic
pMet	Arterial enhancement Prior malignancy Usually RCC
Lymphoma	Bland homogeneous soft tissue Associated LN

Other malignancies

Summary

Simple cyst	VHL APCKD
SCA	“Grandmother lesion” Microcystic but not always Lobulated
Fatty lesions	Cystic fibrosis Incidental Focal fat in ventral pancreas
Focal bulge	Normal feathery texture EUS if uncertain

Completely benign

Summary

Chronic pancreatitis	Can look identical to PDAC EUS if unsure
Groove pancreatitis	Heavy EtOH history DP groove cystic lesions Focal
Autoimmune pancreatitis	Sausage pancreas Halo Cholangiopathy
Tuberculosis	Necrotic nodes Travel history

Inflammatory/infective
